TOLAWAK MERGA

Addis Ababa, Ethiopia | +251 909 689 044 | tolawak6@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building web applications and machine-learning projects. Skilled in frontend and backend development, API integration, Machine Learning integration and database management, with strong problem-solving, adaptability, and collaboration skills. Focused on building practical, reliable, scalable and user-friendly digital solutions..

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL
Frontend: HTML5, CSS3, React, Next.js Tailwind,
Backend: Node.js (Express.js), REST APIs, FastAPI
Databases: PostgreSQL, MySQL, MongoDB
AI: Pandas, Scikit-learn, Numpy, Matplotlib
Tools: Git, GitHub

SELECTED PROJECTS

EthiLearn Tutors — Tutoring Platform
React, Vite, Node.js, Express, TypeScript, PostgreSQL

- Developed a full-stack tutoring platform with a React/Vite frontend and an Express API connected to PostgreSQL.
- Worked on database-backed features, API routes, administrative account functionality, and deployment configuration.
- Troubleshot backend and database deployment issues, including schema and migration problems; managed code changes with Git/GitHub.

Facial Recognition Attendance System — Final-Year Project
Python, React, OpenCV, TensorFlow, PostgreSQL

- Developed an attendance application concept combining facial-recognition/computer-vision processing with a database for attendance records.
- Worked on connecting recognition logic with record management and troubleshooting application behavior.

Human Resource Management System (HRMS) — Internship Project
PHP, MySQL, HTML, CSS, JS

- Contributed to an HRMS project at the Ethiopian Statistical Service intended to digitize employee records and reduce manual record handling.
- Assisted with application development, functional checks, debugging, input validation, and technical documentation.
- Gained practical experience with database-backed workflows and the importance of accurate, consistent records.

Spam Email Classification Model
Python, pandas, scikit-learn, matplotlib

- Built a machine-learning classifier to distinguish spam from legitimate email using a labelled Spam/Ham dataset.
- Prepared text data and reviewed model performance using accuracy and a confusion matrix; observed accuracy was approximately 90%.
- Used evaluation results to understand classification errors and model performance.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer Intern | Ethiopian Statistical Service | Jul 2024 – Aug 2024

- Contributed to the HRMS project to support digital employee-record management.
- Assisted with development tasks, functional testing, debugging, input validation, and documentation.

Independent Web Application Developer | 2026 – Present

- Builds web applications and digital services for practical needs, including a tutoring platform and a digital menu for Naveed Nouman Coffee.
- Connects frontend interfaces to backend APIs and databases where applicable; uses Git/GitHub for version control.

Computing Teacher | Pantokrator International Academy | 2025 – 2026

- Taught computing and programming fundamentals, supporting learners' logical thinking and structured problem-solving.

EDUCATION

BSc in Computer Science | Haramaya University, Ethiopia | 2021–2025
CGPA: 3.12/4

LANGUAGES

English (Proficient) | Amharic (Native) | Afaan Oromo (Fluent)
